

LayWood

Low Cost Wood Adhesive

PRODUCT DESCRIPTION: LayWood is a PVA based bonding agent that is used as low cost wood adhesive. It has good impact resistance and excellent bond strength.

USES: General carpentry, veneering, wood repairs and fixation. It can also be used as a paper and packaging adhesive.

ADVANTAGES: LayWood is a ready-to-use bonding agent that is suitable for all types of wood. Its longer drying time makes it particularly useful in allowing more working time and adjustability during installations.

LIMITATIONS: Do not dilute or mix with water or any other material.

COMPOSITIONS AND MATERIALS: Poly Vinyl Acetate homopolymer and modifying agents

PACKAGING: Packaged in 20 Liter plastic drum.

TECHNICAL DATA: LayWood performs equally well on porous and non-porous surfaces.

INSTALLATION:

Surface Preparation: All surfaces must be clean and free of dust, grease, sealants and foreign matter.

Application: Pour or apply with spatula or small trowel. Apply on both surfaces to be bonded. Fix bonded pieces mechanically for an appropriate period of time to assure good bonding. Thin layers dry faster. Applied heat can speed up drying time.

Precautions: In case of contact wash thoroughly with water. For eyes, get medical attention. Keep out of reach of children.

Cleaning: Wash with water.

Storage Life: One year if stored in cool, dry location. Close partially used containers tightly.
