

LayCure P

Concrete Curing Agent Polymer based

PRODUCT DESCRIPTION: LayCure P is a polymer based latex that is used as a concrete curing compound. It acts as a sealant to encapsulate water into structure to allow complete hydration of cement. It forms a thin film over surfaces and dries up fast for immediate and permanent sealing

USES: Curing of concrete floors, columns, slabs, precast elements and other masonry structures.

ADVANTAGES: LayCure P forms an efficient moisture barrier for optimum curing of concrete, imparts extra hardness to concrete surface, seals concrete surfaces to protect from atmospheric contaminants, protect the surface from harmful UV light, VOC

LIMITATIONS: Not compatible with protective coatings. Do not use during freezing weather.

COMPOSITIONS AND MATERIALS: Internally plasticized acrylic latex and modifying agents

PACKAGING: Packaged in 30 Lit plastic Jerrycan.

APPLICABLE STANDARDS: LayCure P meets or exceeds ASTM 1315-00, ASTM C-309-98a Type 1 Class A, and ASTM C156 and ASTM C-1151

TECHNICAL DATA: LayCure P performs equally well on porous and non-porous surfaces. LayCure P is non-staining and water washable.

INSTALLATION:

Surface Preparation: All surfaces must be clean and free of dust, grease, sealants and foreign matter.

Application: Apply as soon as the concrete sets. Evenly apply fine spray held at approximately 50 cm from surface. Apply in a thin continuous film. Apply another coat if necessary. Do not apply in windy weather. LayCure P can be cleaned easily from surface by scrubbing or removal with a jet of hot water. Allow at least 7 days of curing. Removal of LayCure P is not necessary unless further coating is specified for the concrete surface.

Precautions: Avoid contact with skin. In case of contact wash thoroughly with water. For eyes, get medical attention. Keep out of reach of children.

Cleaning: Wash with water.

Storage Life: One year if stored in cool, dry location. Close partially used containers tightly.
