

LayTex Tar

Latex Modified Bitumen Water Proofing

PRODUCT DESCRIPTION: LayTex Tar High performance waterproof coating that is tough and impermeable.

USES: LayTex Tar provides an impervious waterproofing membrane that protects concrete structures against water and sulfates in soils. It is used to provide damp proofing on concrete tanks and brick foundations, retaining walls and bridge abutments. Protects exterior or interior walls. Used to bond wooden blocks, expanded polystyrene, and cork tiles.

ADVANTAGES: Protects exterior or interior walls. Provides a sandwich membrane in new construction and a surface treatment on existing floors. It is effective in preventing seepage and dampness. Provides resistance against negative water pressure. Provides a key for plaster on difficult surfaces. LayTex Tar is cold applied.

LIMITATIONS: Do not apply on wet surfaces.

TECHNICAL DATA

Binder content : 58% minimum by mass

Specific Gravity : 0.98

Latex Content : 8% minimum by mass in dried film

Color : Black

PREPARATION: Surface to be coated must be clean and structurally sound. Remove all dirt, grease, white wash, grime, paint or other defective materials by chipping, blasting or grinding. Also, remove mineral salts, scum, fungus or efflorescence. Repair all holes, cracks and spalled areas with patching mortar.

APPLICATION: Apply with suitable spraying equipment or roller. Two to three coats are recommended.

COMPOSITIONS AND MATERIALS: Tropical grade, thixotropic cold-applied bitumen emulsion with 8% added latex.

PACKAGING: Packaged in 20 Kg drum.

APPLICABLE STANDARDS: LayTex Tar meets British standard Code of Practice

COVERAGE: 0.6 m²/Liter at 1000 micron DFT.

PRECAUTIONS: In case of contact with eyes wash thoroughly with water. Keep out of reach of children. LayTex Tar is non-flammable but contains some ammonia. Use in a ventilated area.

CLEANING: Remove spills with kerosene.

STORAGE LIFE: Two years if stored in cool and dry location.

MAINTENANCE: LayTex Tar is maintenance-free and permanent.
